GHOST SCANNER

QUICK START GUIDE

Choose how you want to use your Ghost Scanner.
Your video tutorial and Android app download link have been emailed to you.

1 Wireless Connection

View live data on your phone · Android or iPhone

1. **Power on.** Plug Ghost Scanner into your vehicle's power supply.
2. **Join the Wi-Fi.** Allow the system to start, then open your phone's Wi-Fi settings and connect to **GS**.
   Wi-Fi password: `ghostscanner`
   If your phone says "No internet", choose to stay connected.
3. **Open your phone's browser** and type this into the address bar:
   http://10.42.0.1:8765/
   Website password: `ghostscanner`
4. **You're connected.** Live scanner data will appear on your phone. Choose your preferred theme and keep your phone connected to **GS**.

> **Save an icon for next time**
> **Android / Chrome:** Menu ⋮ → Add to Home screen, or Install and create shortcut → Create shortcut.
> **iPhone / Safari:** Share → Add to Home Screen → Add.

2 Car Screen — Android Auto

Android phone · car with wireless Android Auto

1. **Install the app.** Use the Android app download link in your email. You only need to do this once.
2. **Power on.** Plug Ghost Scanner into your vehicle's power supply and allow it to start.
3. **Connect your phone.** Plug the USB tether cable between Ghost Scanner and your phone. In your phone's USB options, turn on **USB tethering**.
4. **Open Ghost Scanner on your phone.** The app connects automatically. When "Waiting for link" changes to "Connected", tap a theme to view live data.
5. **View it in your car.** Connect your phone to the car's wireless Android Auto as usual, then open **Ghost Scanner** on the car screen.

   Keep USB tethering on. For this option, leave your phone connected to the car's Wi-Fi rather than the GS hotspot.

Apple / CarPlay: The iPhone app and Apple CarPlay support are in development and are not yet available. Until then, iPhone customers can use **Wireless Connection** above.
